AVANTHI EDUCATIONAL SOCIETY

Avanthi Educational Society under the Leadership of Sri M. Srinivasa Rao garu as chairman was started in the Year 1991. Within a short span of its establishment, the group has made a remarkable stride in the field of education offering various courses at Under Graduate, Post Graduate, Pharmacy & Engineering levels. This milestone is achieved as the institution carved itself to impart quality and career oriented education, countering the challenges of the modern world through planning, dedication, determination, prompt execution and with the innovative ideas of our advisory board.

Today, Avanthi Educational Society is proud to have a strength of over 16000 students with 15 institutions under its ambit. It is the path of glory towards the success during the last 19 years. The institution has been adjudged many times as the second best educational institutions in the twin cities and 16th best in all over India through the impartial survey made by the renowned magazine "India Today".

AVANTHI INSTITUTE OF ENGINEERING & TECHNOLOGY

AIET started in the year 1999 and offers various courses at Engineering and PG level. The college is providing with rooms, computer centre, laboratories and seminar hall with audio-visual equipments. Industry Institute interaction is conducted regularly to emphasize on the latest trends in the present market.

It is very near to Narsipatnam. Frequent bus facilities are available both from and to Visakhapatnam and Narsipatnam. Very safe and secure hostel facility is

available for Girl students. These are the additional facilities besides excellent academic atmosphere in the college campus.

DEPARTMENT OF MECHANICAL ENGINEERING

Mechanical Engineering department was started in the year 2005 with intake strength of 60 seats, this was increased to 120 students in 2012 and this was increased to 180 students in 2013. The department has well qualified and trained faculty members. It has well equipped laboratories and workshops and includes a CAD/CAM laboratory where students are imparted training in advanced production techniques and design and analysis of machine elements.

The department of Mechanical Engineering has been contributing its humble share of the Mechanical Engineering graduates for national needs. Several of the graduates who have passed out of this department are occupying responsible positions in various Engineering Industries like Hindustan Shipyard Limited, Renault Nissan, Varun Motors, Tata Consultancy Services, HP and IBM and holding responsible positions in the premier educational institutes in and outside India.

ABOUT WORKSHOP

Manufacturing of components have become an important part in reference to the product development in industries for the service of mankind. The knowledge of manufacturing processes is highly essential for all engineers & technocrats for familiarizing themselves with modern concepts of manufacturing technologies. The basic need is to provide theoretical & practical knowledge of manufacturing process

to the entire individual associated with the concerned domain of engineering. Therefore, an attempt has been made through the course to present both theoretical and practical knowledge on advance manufacturing techniques which can caters the general needs of the engineers and technocrats associated in the country. The initiative is advances in modelling, simulation, experimental techniques along with optimization techniques all of which are merging in creating the ability to design and manufacturing process more rapid and at lower cost than traditional approach.

TOPICS TO BE COVERED

- > Fundamental knowledge of principle and physics involved in advance welding and joining process.
- > Thermal and structural finite element modelling of welded structures. Principles and physics involved in additive manufacturing (3D printing) process
- Finite element analysis and modelling of laser based manufacturing process.
- Fundamental knowledge and principles associated with micro forming and micro machining process.
- ➤ Different types of unconventional machining process Laser, Abrasive, Water jet and so on
- ➤ Hands on session on different (FE software based simulation) on different advanced forming/welding techniques

BRIEF REPORT

Department of Mechanical Engineering, Avanthi Institute of Engineering and Technology had organized a certificate course on "ADVANCEMENT IN MANUFACTURING TECHNOLOGY" from 23rd Oct 2017 to 27th Oct 2017

We had Mr. Santosh Kumar, Advanced & Product Planning Section Manager from NISSAN as the speaker gave a proper definition and explained the need for manufacturing process provide theoretical & practical knowledge, he extensively explained the plus points of this technology. One of the major advantage is easier, faster and more effective communication.

We had CH. Anil Kumar, Assistant Professor, Mechanical Engineering Department from LENDI College, He explained about Thermal & Strucatural finite element modelling of welded structure principles and additive manufacturing process. He gave the limitations Often large costs involved with using the latest technology (especially for small businesses) increased risk of job cut, They are generally used for Nano Technology, 3D printing.

We had S. Chaitanya, Assistant Manager from Wheels India, He discussed some of the topics during the course, the different types of Unconventional machining process Laser, Abrasive jet, Water jet. The Process of Advanced Forming/Welding Techniques also explained. He concluded the course with feature of utilised by mechanical engineer in industries.
